## WEB/DESIGN PROJECTS

### **Web/Design Portfolio**

<https://janettxg.github.io/Portfolio>

Personal portfolio with code and design projects.

### **Hiking Trail Review**

<https://hiking-trail-review.herokuapp.com/>

Hiking Trail Review is a full-stack web application. The application allows users to share their favorite hiking trails and review them. This full-stack application is built with Node.js, Express, MongoDB, Mongoose, Passport.js on the application layer. The client-side is Bootstrap, HTML, CSS, and Javascript rendered via EJS. Users add hiking trails with images and a description. The application is hosted on Heroku servers and MLab.

### **Sound Keys Play**

<https://janettxg.github.io/sound-keys-play/>

Sound Keys Play is an application where alphabetical keys are mapped to sound and colored circles. Keys are tracked and can be replayed to create musical notes and color schemes. The application was created using the Howler.js library for audio playback, Paper.js to render vector graphics, and vanilla javascript to record and replay keys.

## EDUCATION

**Associate of Applied Science • Interior Design**

*Northern Virginia Community College • May 2015*
